

Dhanya Bhag

Millet Packaging for a Healthier Tomorrow

KANIKA KADAM

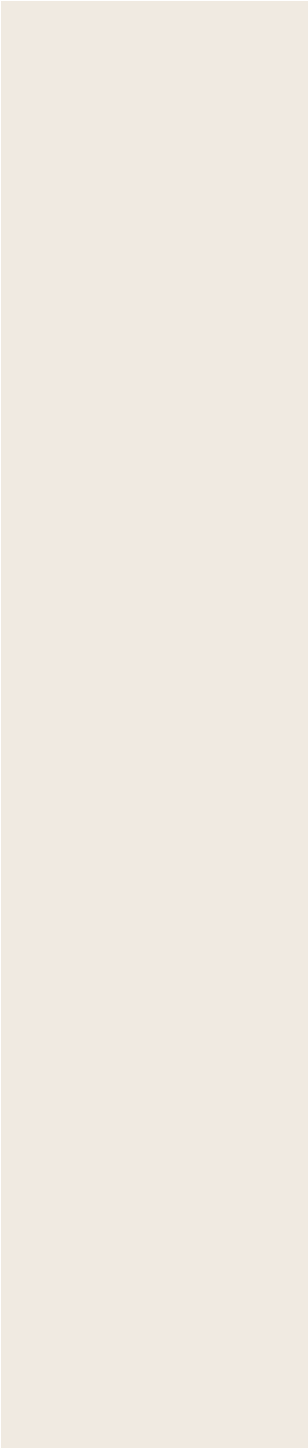

Concept Overview - The Idea Behind Dhanya Bhag

Blend traditional grain values with modern aesthetics

Create partitioned packaging to hold multiple grains.

Design Criteria

OBSERVATION

Packaging plays a key role in purchase decisions.

WHAT THE PACKAGING NEEDED TO DO

Store and separate two millet types.	Offer transparency to view grains.	Be stackable and compact.
--------------------------------------	------------------------------------	---------------------------

IDEATION

Initial ideas focused on form and usability.

Explored cylindrical and prism shapes.

Triangular prism emerged as most unique and functional.

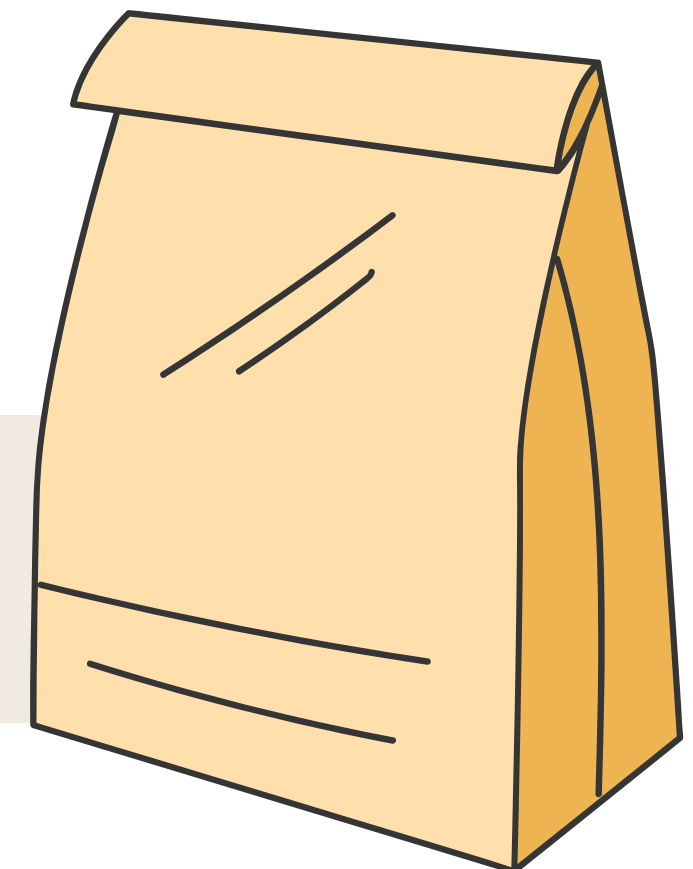

FINAL FORM

TRIANGULAR PRISM STRUCTURE

- Each sides offer multiple branding panels.
- Hexagonal windows enhance grain visibility and remind people of natural shapes.
- Internal partition ensures separation.

MATERIAL & CONSTRUCTION

- Recycled kraft board
- Windows: PLA Sheets (Polylactic Acid)
- Interior: Simple partition wall

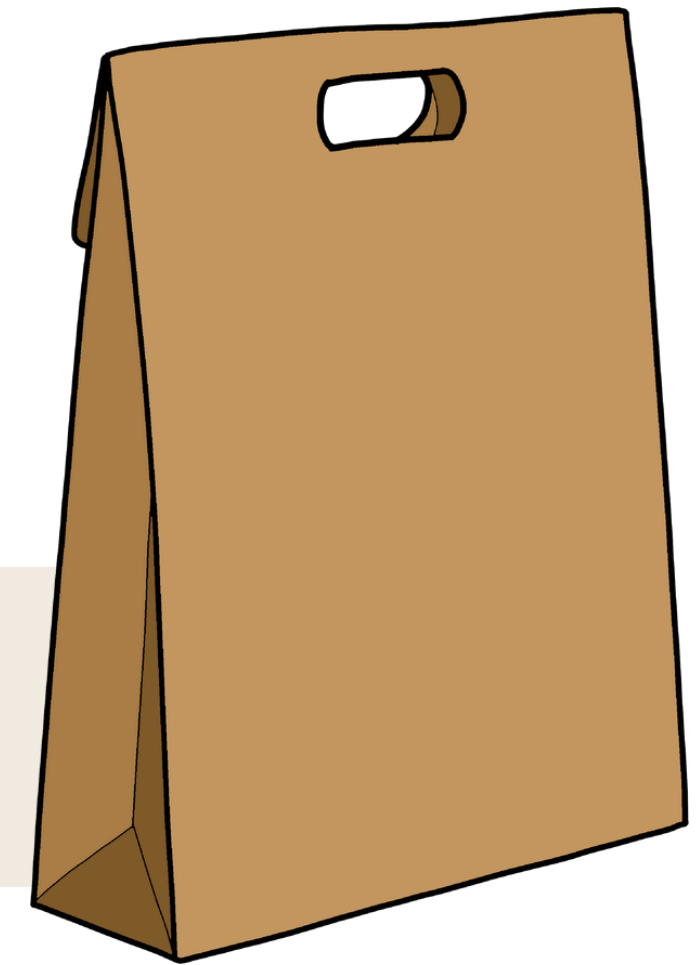

Reflection & Learnings

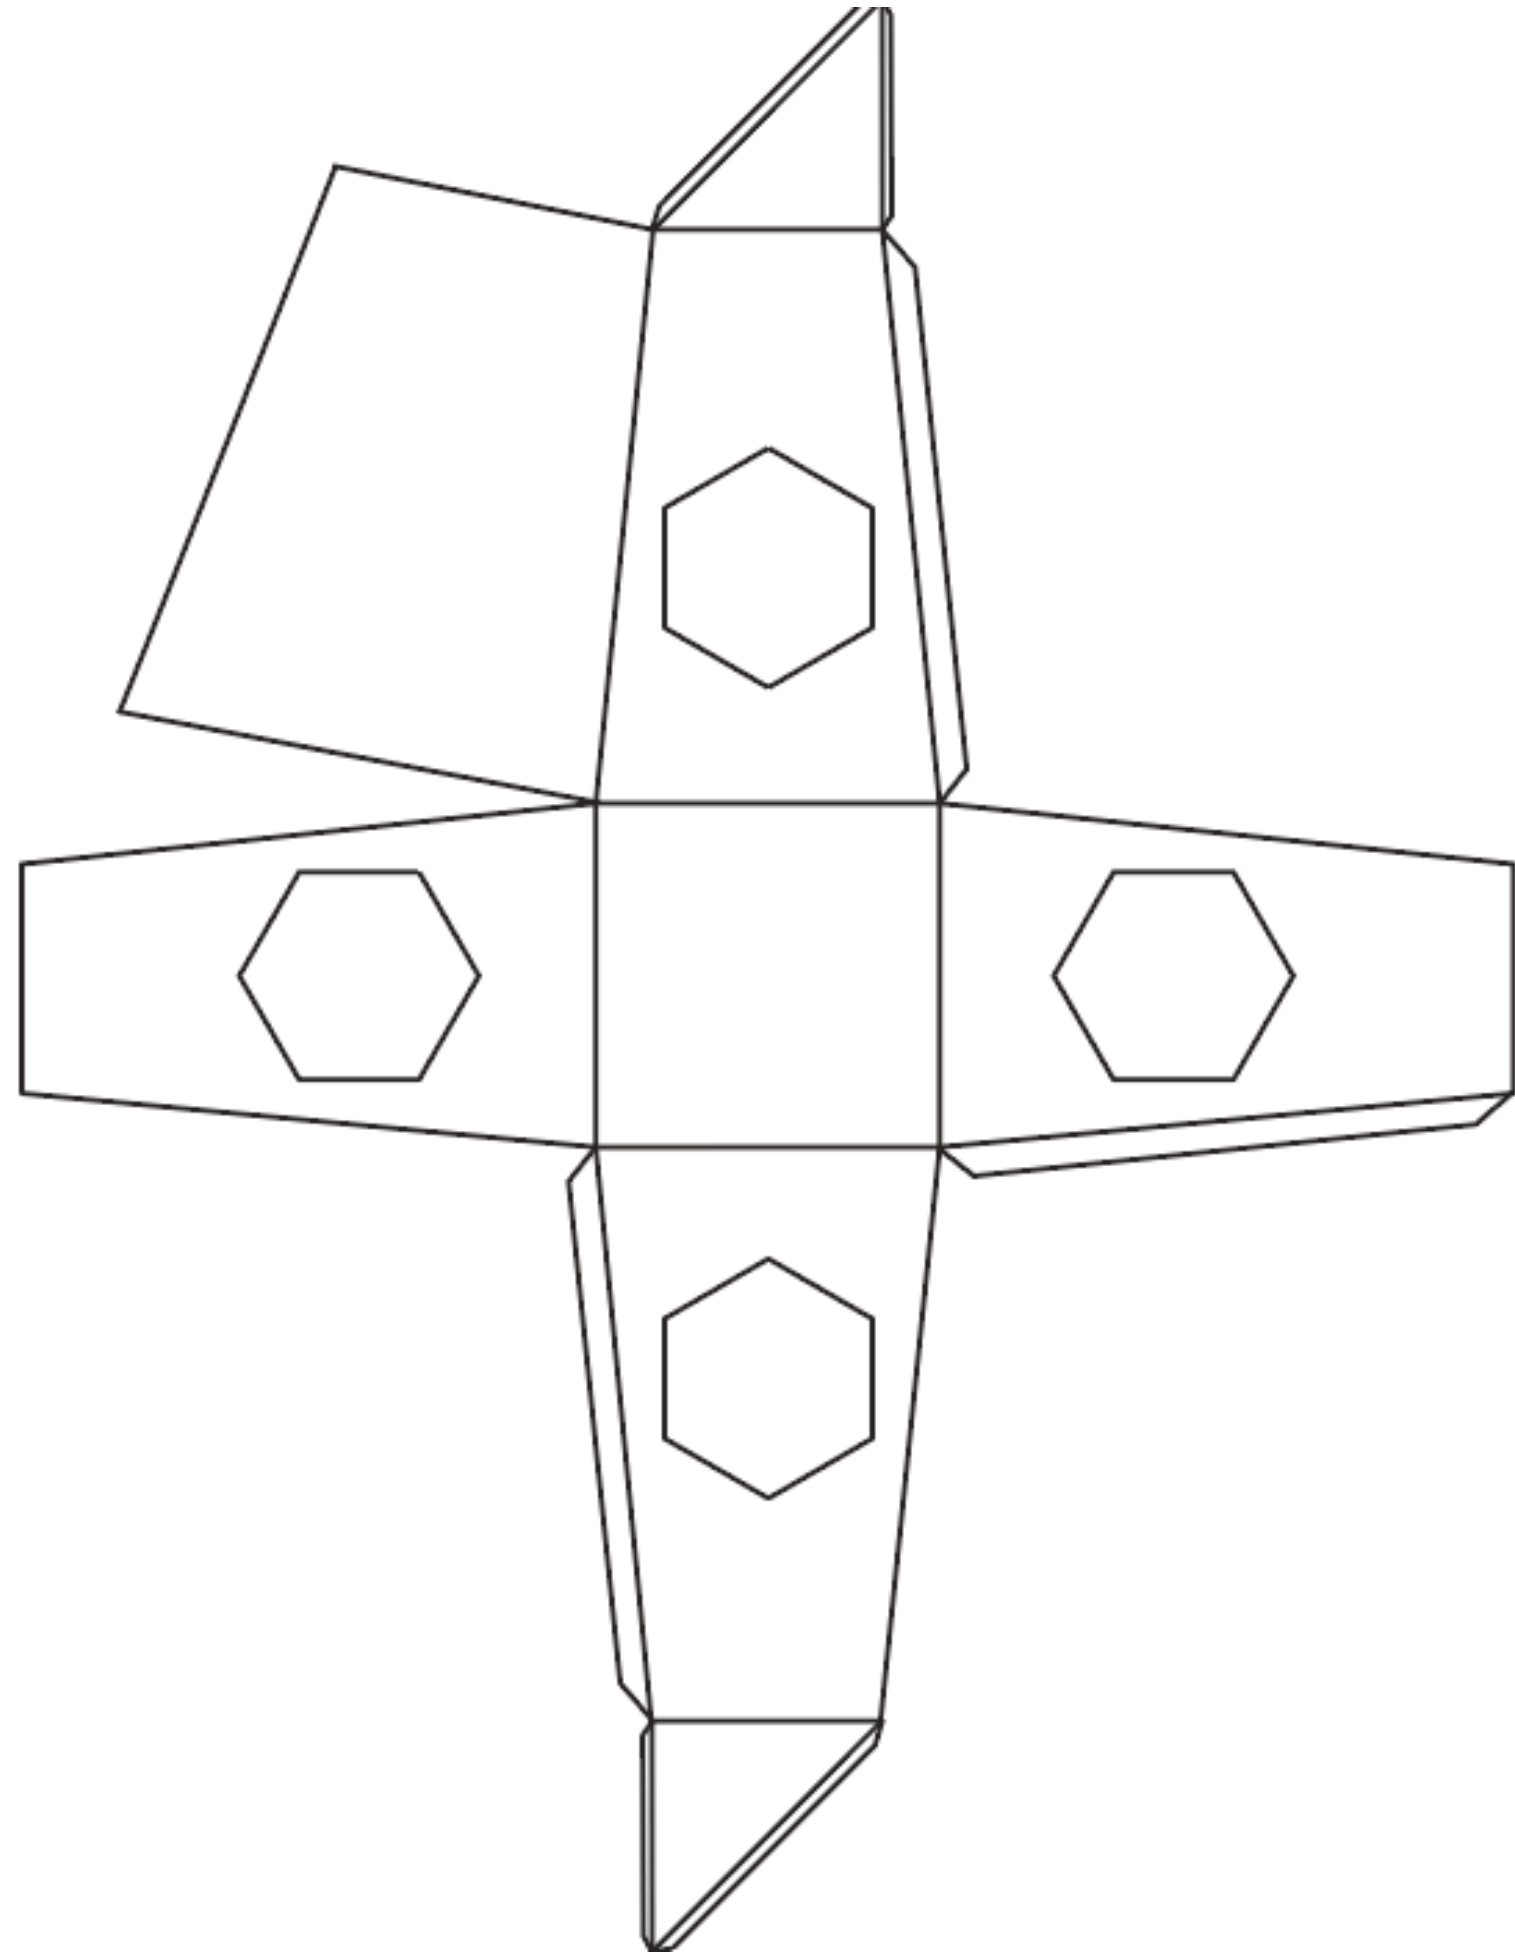

Learned to balance
form and function.

Iterative
prototyping led to
refined structure
and aesthetics.

The packaging reflects
values of health, tradition,
and innovation.
